

Claims

- [c1] That which is claimed is:
1. A retractable blade scraper comprising: (a) a body having top, bottom and base grip components; and (b) a carriage including a blade platform adapted for irremovably receiving and retaining a blade; and (c) a door connected to the bottom with a hinging means; body side with an opening means, said door opening to a storage area contained within said body.
- [c2] 2. A retractable blade scraper as in Claim 1 where said scraper has an ergonomic design.
- [c3] 3. A retractable blade scraper as in Claim 1 where said top and bottom being comprised of a hard plastic and said grip being comprised of a soft plastic.
- [c4] 4. A retractable blade scraper as in Claim 1 where said carriage has two positions, storage and scraping/loading position.
- [c5] 5. A retractable blade scraper as in Claim 1 where said storage area is attached to said top.
- [c6] 6. A retractable blade scraper as in Claim 1 where said storage area is used to store used and unused blades.
- [c7] 7. A retractable blade scraper as in Claim 1 where said top has a ribbed area.
- [c8] 8. A retractable blade scraper as in Claim 1 where said top has a safety wall.
- [c9] 9. A retractable blade scraper as in Claim 1 where said device is comprised of a hard plastic and a soft plastic.
- [c10] 10. A blade scraper comprising: (a) a body; and (b) a carriage including a blade platform adapted for irremovably receiving and retaining a blade with said carriage allowing side loading of a blade.
- [c11] 11. A retractable blade scraper as in Claim 10 where said scraper has an ergonomic design.
- [c12] 12. A retractable blade scraper as in Claim 10 where said body being comprised

of a hard plastic and a soft plastic.

- [c13] 13. A retractable blade scraper as in Claim 10 where said carriage has two positions, storage and scraping/loading position.
4. [c14] 14. A retractable blade scraper comprising: (a) a body; and (b) a carriage; and(c) a door connected to the bottom with a hinging means; body side with an opening means, said door opening to a storage area contained within said body.
- [c15] 15. A retractable blade scraper as in Claim 14 where said scraper has an ergonomic design.
- [c16] 16. A retractable blade scraper as in Claim 14 where said body being comprised of a hard plastic and a soft plastic.
- [c17] 17. A retractable blade scraper as in Claim 14 where said carriage has two positions, storage and scraping/loading position.
- [c18] 18. A retractable blade scraper as in Claim 14 where said storage area is attached to said body.
- [c19] 19. A retractable blade scraper as in Claim 14 where said storage area is used to store used and unused blades.
4. [c20] 20. A retractable blade scraper comprising: (a) a body having top, bottom and base grip components; and (b) said top and bottom being comprised of a hard plastic; and (c) said grip being comprised of a soft plastic.
- [c21] 21. A retractable blade scraper as in Claim 20 where said scraper has an ergonomic design.
- [c22] 22. A retractable blade scraper as in Claim 20 where said top and bottom being comprised of thermo-plastic and said grip being comprised of an elastomer.
- [c23] 23. A retractable blade scraper as in Claim 20 where in said scraper has a carriage with a storage position and scraping/loading position.
- [c24] 24. A retractable blade scraper as in Claim 20 where in a door is connected to the bottom with a hinging means; body side with an opening means, said door

opening to a storage area contained within said body.

- [c25] 25. A retractable blade scraper as in Claim 20 where in a door is connected to the bottom with a hinging means; body side with an opening means, said door opening to a storage area contained within said body, said top having a ribbed area and a safety wall.
